

## Curriculum Corner

Check out some of the latest activities and lessons taking place in our classrooms! Our students are learning about different types of buildings, how to make collages, and more. We love seeing our students learn new skills, build upon previous knowledge, and have fun with their classmates!

Students learned what collages are, and had the chance to make their own using scissors, glue, and pictures of buildings.

These students worked together to organize six different magnetic sets of the alphabet by color!

At our Lansdale center, teachers created an interactive walking activity using chalk. Students followed the path and did activities corresponding to different shapes!
